

Reduce your fabricating costs by

using a one-piece steel casting

- Are your welded steel assemblies complicated or causing delays at any stage of production?
- Do you have high scrap rates when using bar and plate to produce your welded steel assemblies?
- Do you miss targeted mechanical properties with your standard welded steel assemblies?
- Are you looking for dimensions or alloys difficult to find in steel bar and plate ?

Compared to a welded assembly, a one-piece steel casting in your optimum alloy will yield uniform mechanical properties with no design limitations!

Call to discuss your specific requirements with our experienced metallurgical engineers.

YOUR BSL CASTING SALES REPRESENTATIVE IS :

BSL CASTING : PROVIDING REAL SOLUTIONS - REPLACING WELDED STEEL ASSEMBLIES WITH ONE-PIECE STEEL CASTINGS

BSL CASTING foundry

664 Chemin Sainte-Odile
Rimouski (Qc) G5N 1X3
Tel : (418) 725-5543
Fax : (418) 725-5542
